

Tank.hu

Tank driving attraction in Hungary

Várpalota

About US

At our facility you can try out the driving of real tanks! An unforgettable experience! All the tank types that are displayed in this website, can be driven by YOU! We have a proving ground of 36 acres of off road terrain, full of off-road obstacles - which you can cross in the cockpit of a TANK. Our vehicles can be tried out in:

- tours for individual guests
- or in programs for groups

The tank driving in groups is ideal for team building, corporate events or partner meetings. Moreover, at our facility, even product introduction events can be held, enhanced by tank show!

For event organizers and travel operators we would like to recommend our Call for cooperation (see below.)

You can find more details on our website. Our contacts are:

E-Mail: info@tank.hu

Programs for individual guests

Steps

1. Arrival at the facility, parking is provided for cars and coaches. We are very close to Várpalota railway station - we can provide transfer from the railway station to the facility

2. In the reception / briefing room, restroom is available for our guests. In the briefing room, the theoretical training for tank driving takes place, the vehicles are introduced, instructions are given and the disclaimers are to be signed here. We provide protective overall and shoes for the adventure. Dressing up for the experience is to be done in the briefing room, or in case of larger groups, it takes place in a dedicated military tent.

3. Machines of the arranged types are prepared for start - Our instructors give a short training onboard the vehicle. Once it is done, our guests that are only travelling on the vehicle take their position onboard, and the driving ADVENTURE CAN START!

4. If the program contains the driving of more than one vehicles, then our tanks return to the starting position, new drivers can get onboard, and the travellers can travel on other types as well.

Programs for groups

Group tank driving is an ideal opportunity to integrate your team through common experience. During the tours, the guests learn to drive tanks and to cope with incredible off-road obstacles, using our highly capable military vehicles. The feeling and the experience of ruling such a monster of war is unique and life-long lasting. If it happens in a group, the common experience deepens the relations and helps to further integrate your team! During the tours, a skilled instructor is always on the board of the vehicle. In case of

larger groups (more than 20 members), the group is divided into sub-groups. One of these groups drive tanks while others are entertained by other activities . Once the first sub-group finishes tank diving, the groups are rotated: the second sub-group drives tanks, and the others perform various other activities and so on until everyone has driven a tank.

Our instructors speak English and Hungarian.

Tank Base

One of the most important elements of our facility is the tank base. Our guests find here the reception and briefing room where the theoretical training takes place for our individual guests. The base also contains a parking area - suitable for cars, coaches and minibuses as well, and a shelter for our military vehicles.

Driveable vehicles

T-55 Main Battle Tank

Highly mobile, heavily armored and has great firepower.

Starred in many movies:

James Bond: Goldeneye,
Beast of War, etc.
